

3D & Multimedia

We design and create 3D models and interactive multimedia (online & offline) for a wide variety of commercial use, using HTML, Flash, CINEMA 4D, XML, scripting, and bespoke programming.

Two of the many projects we have successfully completed are:

1. An online presentation created in Flash, with bespoke 3D models and animations, enabling a large pharmaceutical company to educate their staff worldwide on the products they create and provide to the medical industry. It was hosted online and accessed by over 3,300 employees over a fixed period.
2. A fully animated website (with characters drawn in Adobe Illustrator) for a leading UK marketing communications agency. The website won several awards including a Cream silver award for best use of illustration/animation and an Institute of Practitioners in Advertising (IPA) best of health award (www.darkhorseagency.com)

We can provide the following list of services for you, or your clients:

- multimedia cd-roms
- multimedia dvds
- powerpoint presentations
- apple keynote presentations
- adobe flash presentations
- animated sales tools

- flash websites / microsites
- online rich media / banners
- flash applications
- flash animations
- flash advertisements
- flash actionscripting

All above services are charged at £60.00 per hour +vat.
Fixed project costs available upon request.
