

iPhone & iPad

If you've got a new iPhone or iPad and want help, support or advice on how to set it up and configure it with specific applications of use to your business, we can help.

We can show you the basics to get you started and then, once you are comfortable in their regular usage, we can demonstrate some of the little known tricks and treats that are hidden away within these amazing products.

If you just wish to use the iPhone for mobile phone calls, that's fine... after all, it's primary function is exactly that! However, if you want to utilise it to the fullest extent and understand all the applications it can provide, we will be very happy to surprise you.

On iPad, you can review and edit common office documents such as Microsoft Office and iWork files. You can also create beautiful presentations from scratch, craft complex spreadsheets, annotate PDFs and access important files on your corporate network.

When you're out of the office, iPad can keep you connected, on-schedule and in-the-know, whether you're across the county or across the world.

Access your Mac or PC for quick lookup of information or documents. Attend online meetings with colleagues, complete with VoIP connectivity. Track to-do's, organise notes and media, and assign tasks and reminders while you're on the road.

All these things (and much much more) are possible with Apple's iPhone & iPad.

We have in-depth experience of all things Apple. We use many of their wonderful products in running our daily business and over the years have accumulated a great knowledge bank of solutions to any problems that may arise when using them.

If you've got a new iPhone or iPad and want help, support, advice, or just an informal chat on any aspect, just call us on **0845 060 3247** or email **hello@E247.co.uk**.
